lumbergautomation
A BELDEN BRAND

Belden® Solutions

In a world moving toward interoperability, visibility is vital to operators as they face increasing demands to receive, analyze and share data. Belden's industrial connectivity solutions address these needs head on. With more connected machines, increasing data volumes and productivity demands at an all-time high, customers in challenging environments can count on Belden cable, Lumberg Automation™ and Hirschmann™ industrial connectors for a complete communications infrastructure designed to last. Belden's customized systems provide robust performance and reliability for a wide range of industrial automation applications.

Be certain. Belden.

A wide range of applications, space-saving designs, and technical know-how for every environment

About Lumberg Automation™

Lumberg Automation™ is a Belden brand that for more than 30 years has stood for high-quality connectors and wiring components for all areas of industrial automation technology. The products support intelligent wiring solutions, such as electronic field bus, connector and distribution box systems, for industrial automation applications. Our end-to-end wiring concepts for mechanical and plant engineering are ideal for automotive body and assembly and powertrain manufacturing, handling/assembly applications and food and beverage machinery.

Why Lumberg Automation™

Compact design, chemical resistance and high mechanical and electrical loading capacity are the outstanding features of Lumberg Automation™ products. From single- and double-ended cordsets to centralized and decentralized field bus components, Lumberg Automation™ offers optimal solutions at field level.

A Professional Team, on Hand to Offer Help and Advice

Thanks to technical expertise in wiring and field bus technology, and wide-ranging industry-specific expertise, our organization guarantees close cooperation with the customer and responds quickly to customer-specific requirements.

Compact I/O Modules from Lumberg Automation™

Enjoy the benefits of our experience and innovations

General Information

The growing level of automation in all areas of manufacturing requires increasingly complex wiring and cabling techniques. Apart from the high costs of assembly, service problems are an inevitable consequence of complex and obscure wiring.

Passive and active I/O distribution boxes are used in wiring technology to solve this problem while optimizing systems. There are two alternative solutions to on-machine wiring. We define these as passive and active systems. Passive wiring systems combine signals from sensors and actuators and transfer those signals via a single common control cable. Active wiring systems are more intelligent and the connection to the control cabinet is made by a standard fieldbus system. There are a number of fieldbus systems in place today. Lumberg Automation™ supports PROFIBUS, DeviceNet™, CANopen®, Interbus, AS-Interface as well as Ethernet (Modbus TCP), EtherNet/IP and PROFINET.

Traditional point-to-point wiring techniques from the end-effector (sensor/actuator) to the control cabinet can be replaced by on-machine active or passive I/O modules or distribution boxes. By using an on machine distributed I/O system, significant reductions in installation and maintenance time is achieved and the overall performance of the system is improved. To insure signal quality, industry standard M8 and M12 rounded over molded quick-disconnect connectors are used to complete the wiring installation.

Overall, this means a considerable reduction in the effort required for ordering and storage as well as planning, configuring and commissioning machines and automated systems.

Customer Benefits

- Increased efficiency: everything from a single source, when different systems are being used.
- Cost savings: extremely robust design with IP67 protection class, the modules can be installed directly on the machine to minimize traditional field wiring techniques.
- High operational reliability and system availability: robust design – shock and vibration proof.

Product Features

- Protection against dust and liquids: because the distribution boxes and I/O modules offer IP67 protection class, installation can be performed directly on site near the actuators and sensors and additional protection by means of a control cabinet are no longer required.
- Vibration and shock resistance: an additional advantage of the distribution boxes and I/O modules is the high level of vibration resistance, while providing increased security of the electrical wiring.
- Wide range:
  - Active, passive, modular distribution boxes and I/O modules with between 4 and 16 slots
  - Different housing variants, in plastic, stainless steel or die-cast zinc depending on the ambient conditions
  - Various configurations: depending on the space requirements, small (LioN-S, LioN-Link, ASB-S) or compact (LioN-M, LioN-R, LioN-Classic, ASB-Classic, ASB-R) versions with M8 or M12 slots (one or two-row)

Applications

Mechanical engineering

Connection of sensors and actuators, for example, magnetic valves (communication between sensors/actuators and control level).

- Metal processing machines
- Material handling and robotics
- Food & beverage
  (packaging machines, handling, transport)
- Woodworking machines and equipment, etc.

Automotive

- Engine and transmission manufacturing
- Welding robots (bodywork)
- Assembly/handling

Active I/O Modules and Stand-Alone Designs (LioN-S-, LioN-M-, LioN-R-, LioN-Classic Series)

General Information

In order to ensure high availability of machines and systems, I/O modules installed in harsh industrial environments must be able to meet the highest electro-mechanical demands. Thanks to their housing material and innovative encapsulation techniques, the LioN Series of distribution boxes and I/O modules offer full protection for the electronics.

We offer you the best solution for every requirement

LioN-S and -M

LioN-S: Because of their compact construction, the LioN-S modules with M8 connections are ideally suited for systems where space is limited. In addition, the modules in this series can be secured to the front, side or directly on the machines profile rails.

LioN-M: The convenient and vibration-proof I/O modules with M12 connection technology support PROFINET, Ethernet/IP, PROFIBUS and DeviceNet™. The different configurations can be realized with the assistance of a universal module, both for LioN-S and for LioN-M I/O modules. Each individual channel can be used either as an input or an output. This offers excellent flexibility for planning or for making changes during commissioning and subsequent upgrades.

- Simple planning and cost-effective storage of spare parts with universal I/O functionality.
- Small connection with various installation possibilities.
- Low empty weight – ideally suitable for assembly and handling applications.
- Fast commissioning, through simple and comprehensive diagnostics.

LioN-R

The new ruggedized I/O modules in the LioN series (LioN-R) have a robust design and a high level of functionality. They provide a secure connection of actuators and sensors to the control cabinet, even under extreme environmental conditions.

- The fully enclosed metal housing guarantees optimal mechanical stability and maximum protection against the most adverse environmental conditions.
- Galvanic isolation between sensors and actuators and the Ethernet/field bus protocol, together with short-circuit proof outputs and the “easy diagnostics” concept, ensures maximum availability of machines and systems.

LioN-Classic

The LioN-Classic modules are available in a sturdy molded plastic housing, for example, with M23 connection technology for hybrid cables (power supply and bus lines in a single cable).

- Excellent reliability even under harsh environmental conditions – proven for decades.
- Wide choice of options for the different field bus protocols.

Customer Benefits

- Cost savings/profit increases
- Simple and fast installation and maintenance: the time required is minimized since the signals are bundled and transmitted via the field bus/Ethernet
- Flexibility: all standard field bus systems are supported
- Reliability: fail-safe modules with long service life (long-term stability)
- Rapid sourcing of spare parts, thanks to a large global sales network

Product Features

- Environmental temperature depending on type from -25°C to +60°C
- Materials (depending on type of module)
  - Housing: die-cast zinc, V4A, PBT or PUR
  - Inserts: PA
  - Contacts: CuZn, pre-nickeled and gold plated
- Mechanical data
  - Protection class IP67/IP68/IP69K
- Electrical data
  - Nominal current at +40°C: 0.5 A to 2 A per channel and up to 12 A per module
  - Nominal voltage: 18 to 30 V DC

I/O Modules Active – Stand-Alone: PROFINET

Be certain. Belden.

PROFINET – Process Field Network

PROFINET (Process Field Network) is an open Industrial Ethernet Standard for automation from Profibus & Profinet International (PI). PROFINET uses the Ethernet standard, is a realtime-capable system and is standardized under IEC 61158 and IEC 61784. PROFINET minimizes the costs of installation, engineering and commissioning for manufacturers of machines and systems. Operators can extend their systems with ease and at the same time benefit from a high level of system availability.

The PROFIsafe safety technology familiar from PROFIBUS is also available for PROFINET. PROFIBUS systems and other field buses such as Interbus® and DeviceNet™ can be implemented via gateways in any mixed installations comprising field bus and PROFINET-based subsystems.

PROFINET also allows use of web technologies by means of the Ethernet-based protocol – access to a web server integrated in the field devices. This allows addressing, diagnostic and other information to be retrieved easily across network boundaries using standard web browsers.

General Technical Data

Universal functionality for cost-effective and reliable solutions

Transmission medium

- 4 or 8-wire (2 or 4-pair) shielded cable as per ISO/IEC 11801 Edition 2.0, IEC 61156-1, IEC 61156-5 (Minimum Category 5)
- Optical fiber
- Hybrid cable for transmitting data and energy

Network topology

- Line structure or structured cabling using switches

Number of devices

- Arbitrary, depends on network structure

Reliable transmission rates and segment lengths

- Max. 100 Mbit/s (Fast Ethernet)

Configuration of devices

Configuration of the individual devices is performed on the basis of GSDML files (device master file in XML format), provided by the manufacturer for every slave. The GSDML files for Lumberg Automation™ bus modules can be downloaded at www.lumberg-automation.com/downloads.

Addressing

Addressing is performed based on a symbolic device name assigned by the DCP protocol.

I/O Modules Active – Stand-Alone: EtherNet/IP

Be certain. Belden.

EtherNet Industrial Protocol

A procedure was developed in 1998 by a ControlNet International working group for adapting the application protocol, the Common Industrial Protocol, to Ethernet. EtherNet/IP was published as an official industrial standard based on this procedure in March 2000.

EtherNet/IP (EtherNet Industrial Protocol, or EIP for short) is a real-time protocol used primarily in automation technology, and is promoted by more than 150 manufacturers. Based on the TCP and UDP standards, EtherNet/IP supports continuity between the office and production network. The web server integrated in the Logix control interface module can be used during startup (diagnostics) of EtherNet/IP networks as well as web servers available in other EtherNet/IP equipment.

The typical cycle time of an EtherNet/IP network is 10 ms, which means it is not suitable for "hard" realtime applications (< 1 ms), for example, for controlling servo motors. A protocol extension is available for EtherNet/IP for this purpose in the form of CIPSync or MotionSync. Normal twisted pair cables or fiber optic cables are used as a transmission medium.

General Technical Data

Optimized installation and use for increased efficiency

Transmission medium

- 4 or 8-wire (2 or 4-pair) shielded cable as per ISO/IEC 11801 Edition 2.0, ANSI/TIA/EIA-568-B.2 Annex N, Category 5 (minimum)
- Optical fiber
- Hybrid cable for transmitting data and energy

Network topology

- Line structure or structured cabling using switches
- Implemented DLR (Device Level Ring Protocol) allows uninterruptible operation

Number of devices

- Arbitrary, depends on network structure

Reliable transmission rates and segment lengths

- Max. 100 Mbit/s (Fast Ethernet)

Configuration of devices

Configuration of the individual devices is performed on the basis of EDS files (Electronic Data Sheet), provided by the manufacturer for each slave. The EDS files for Lumberg Automation™ bus modules can be downloaded at www.lumberg-automation.com/downloads.

Addressing

Addressing is performed on the basis of three rotary switches, which are used to set the last octet of the IP address. Addressing can alternatively be performed by means of a BOOTP server or DHCP server.

EtherNet/IP – Digital Inputs

Technical Information

Product Description		
Type	**0980 ESL 811-EIP 16DI-M12-R**	**0980 ESL 711**
		
Description	LioN-R EtherNet/IP device with 16 digital input channels, rotary switches for addressing, M12 LAN connection, 4-poles, D-coded, 7/8" power supply, 4-poles	LioN-M EtherNet/IP device with 16 digital input channels, rotary switches for addressing, M12 LAN connection, 4-poles, D-coded, 7/8" power supply, 4-poles
Technical Data		
Protection Class	IP67	
Environmental Temperature	-10°C to +60°C	
Weight	620 g	380 g
Bus System		
ID Number	0x07	–
EDS File	EDS-V3.9-LumbergAutomation-0980ESL811-20130320.eds	Lion-M_EDS_0980ESL711_Rev_V1_2.eds
Transmission Rate	10/100 Mbit/s	
Address Range	0 to 255	–
System/Sensors Power Supply		
Rated Voltage	24 V DC	
Voltage Range	19 to 30 V DC	
Power Consumption	typ. 90 mA	
Input Power Supply		
Voltage Range	19 to 30 V DC	
Sensor Current	200 mA	200 mA (at T_{amp} +30°C)
Indicator	LED green	
Inputs		
Rated Input Current	24 V DC	
Number of Digital Channels	16	max. 16
Status Indicator	LED white per channel + yellow	LED yellow per channel
Diagnostic Indicator	LED red per port	LED red per socket
Included in Delivery		
M12 Dust Covers	4 pieces	
Attachable Labels	10 pieces	

Bit Assignment

Bit	7	6	5	4	3	2	1	0
M12 Input								
Byte 0	4B	4A	3B	3A	2B	2A	1B	1A

Transmission Rate	10/100 Mbit/s	
Address Range	0 to 255	
Inputs		
Rated Input Current	–	24 V DC
Number of Digital Channels	–	8
Status Indicator	–	LED white per channel + yellow
Diagnostic Indicator	–	LED red per port
Output Power Supply		
Rated Voltage	24 V DC	
Voltage Range	19 to 30 V DC	
Reverse Polarity Protection	yes/antiparallel diode	
Indicator	LED white	
Outputs		
Rated Output Current	1.6 A per channel	
Short Circuit-proof	yes	
Max. Current Carrying Capacity	9 A per module	
Number of Digital Channels	16	8
Status Indicator	LED white per channel + yellow	
Diagnostic Indicator	LED red per port	
Included in Delivery		
M12 Dust Covers	4 pieces	
Attachable Labels	10 pieces

0980 ESL 812/813-EIP

EtherNet/IP – Universal

Technical Information

Product Description	
Type	0980 ESL 710
	
Description	LioN-M EtherNet/IP device with 16 digital I/O channels, channels can be used universally as inputs or outputs, rotary switches for addressing, M12 LAN connection, 4-poles, D-coded, 7/8" power supply, 4-poles
Technical Data	
Protection Class	IP67
Environmental Temperature	-10°C to +60°C
Weight	380 g
Bus System	
EDS File	Lion-M_EDS_0980ESL710_Rev_V1_2.eds
Transmission Rate	10/100 Mbit/s
System/Sensors Power Supply	
Rated Voltage	24 V DC
Voltage Range	19 to 30 V DC
Power Consumption	typ. 90 mA
Input Power Supply	
Voltage Range	19 to 30 V DC
Sensor Current	200 mA (at T_{amp} +30°C)
Indicator	LED green
Inputs	
Rated Input Current	24 V DC
Number of Digital Channels	max. 16
Status Indicator	LED yellow per channel
Diagnostic Indicator	LED red per socket
Output Power Supply	
Rated Voltage	24 V DC
Voltage Range	19 to 30 V DC
Reverse Polarity Protection	yes/antiparallel diode
Indicator	LED green
Outputs	
Rated Output Current	1.6 A per channel
Short Circuit-proof	yes
Max. Current Carrying Capacity	9 A (12 A) per module
Number of Digital Channels	max. 16
Status Indicator	LED yellow per channel
Diagnostic Indicator	LED red per socket
Included in Delivery	
M12 Dust Covers	4 pieces
Attachable Labels	10 pieces

Bit Assignment

Bit	7	6	5	4	3	2	1	0

I/O Modules Active – Stand-Alone: PROFIBUS

Be certain. Belden.

PROFIBUS – Process Field Bus

PROFIBUS (Process Field Bus) is an open fieldbus standard in compliance with the international standard EN 50170. To meet various demands in automation technology PROFIBUS is subdivided into three different profiles:

- PROFIBUS-FMS (Field Message Specification):
  Protocol for communication between different control systems (PLCs or PCs)
- PROFIBUS-PA (Process Automation):
  Intrinsically safe bus system for process technology
- PROFIBUS-DP (Decentral Periphery):
  Transmission protocol for the communication between control system and decentral input/output assemblies

The I/O Modules from Lumberg Automation™ Support the PROFIBUS-DP Protocol

Thanks to support from most leading control unit manufacturers, and to vendor-independent enhanced development by PNO (Profibus User Organization), PROFIBUS will also play an important role in field bus systems in the future.

Reliable PROFIBUS solutions for industrial automation technology worldwide

General Technical Data

Transmission medium

- 2-wire, shielded cable (according to RS485)
- Fiber optic cable
- Hybrid cable for the transmission of data and supply voltage

Network topology

Line structure with active bus termination (resistance network) at both ends of a segment.

Number of devices

- 32 per segment
- Repeaters can be used to expand the bus to up 126 participants

Reliable transmission rates and segment lengths

This depends on the transmission rate (Baud rate) the segment lengths and the number of repeaters which can be switched serially.

Bit/s	9.6 k	19.2 k	45.45 k	93.75 k	187.5 k	500.0 k	1.5 M	3, 6, 12 M
Length (m)	1.200	1.200	1.200	1.200	1.000	400	200	100
Max. number of repeaters	7	7	7	7	7	7	4	4

Configuration of devices

The individual participants are projectioned by means of the GSD files (configuration file) which are provided by the manufacturer for each slave. The GSD files for the Lumberg Automation™ bus modules can be downloaded from www.lumberg-automation.com/downloads.

Addressing

An individual address is allocated to each participant via rotary address switches (address 1...99) or addressing tools (address 1...126).

PROFIBUS – Digital Inputs

Technical Information

Product Description	
Type	**0970 PSL 811-PB-DP 16DI-M12-R**
	
Description	LioN-R PROFIBUS-DP device with 16 digital inputs to connect standard sensors, 8 x M12 socket, A-coded, 5-poles, rotary switches for addressing, PROFIBUS connection 2 x M12, 5-poles, B-coded, power supply 2 x 7/8", 5-poles
Technical Data	
Protection Class	IP67
Environmental Temperature	-10°C to +60°C
Weight	615 g
Housing Material	Metal (die-cast zinc)
Bus System	
ID Number	0E94
GSD File	LUM_0E94.gsd
Transmission Rate	max. 12 MBaud
Address Range	1 to 125 dez (default address: 126 dez)
System/Sensors Power Supply (Us)	
Rated Voltage	24 V DC
Voltage Range	18 to 30 V DC
Power Consumption	typ. 60 mA
Input Power Supply	
Voltage Range	min. (Us – 1.5 V)
Sensor Current per Socket	200 mA (at T_{amp} +30°C)
Indicator	LED green/red
Inputs (Type 3 acc. to IEC 61131-2)	
Rated Input Current	24 V DC
Number of Digital Channels	16
Status Indicator	LED yellow channel A/LED white channel B
Diagnostic Indicator	LED red per port
Included in Delivery	
M12 Dust Covers	4 pieces
Attachable Labels	10 pieces

Bit Assignment

PROFIBUS – Digital Outputs

Technical Information

Product Description	
Type	0970 PSL 812-PB-DP 16DO-M12-R
	
Description	LioN-R PROFIBUS-DP device 16 digital output channels with galvanic isolation to connect standard actuators, 8 x M12 socket, A-coded, 5-poles, rotary switches for addressing, PROFIBUS connection 2 x M12, 5-poles, B-coded, power supply 2 x 7/8", 5-poles
Technical Data	
Protection Class	IP67
Environmental Temperature	-10°C to +60°C
Weight	615 g
Housing Material	Metal (die-cast zinc)
Bus System	
ID Number	0E94
GSD File	LUM_0E94.gsd
Transmission Rate	max. 12 MBaud
Address Range	1 to 125 dez (default address: 126 dez)
System-Stromversorgung	
Rated Voltage	24 V DC
Voltage Range	18 to 30 V DC
Power Consumption	typ. 60 mA
Output Power Supply	
Rated Voltage	24 V DC
Voltage Range	18 to 30 V DC
Reverse Polarity Protection	yes/permanent inverse polarity protection
Indicator	LED green
Outputs	
Rated Output Current	1.6 A per channel
Short Circuit-proof	yes
Max. Strombelastbarkeit	9 A per module
Number of Digital Channels	16
Channel Type N.O.	p-switching
Status Indicator	LED yellow channel A/LED white channel B
Diagnostic Indicator	LED red per port
Included in Delivery	
M12 Dust Covers	4 pieces
Attachable Labels	10 pieces

I/O Modules Active – Stand-Alone: DeviceNet™

Be certain. Belden.

DeviceNet™ – Versatile Use in Factory Automation

DeviceNet™ is part of the CIP protocol family. CIP stands for "Common Industrial Protocol". It is the platform for several communication protocols including DeviceNet, EtherNet/IP and CompoNet, as well as protocol enhancements for safety applications (CIP Safety) and motion control (CIP Motion).

DeviceNet™ is a fieldbus system for the direct connection of sensors and actuators in the field (e.g. proximity switches, motor starters, valves, etc.). DeviceNet™ originated in North America and and is presently used worldwide in all areas of plant automation.

DeviceNet™ is based on the CAN specifications (Controller Area Network). However, unlike CAN it is restricted in functionality for easier implementation.

General Technical Data

Robust and reliable for meeting the strictest electro-mechanical requirements

Transmission medium

The individual stations are generally connected via a hybrid cable to transmit data (according to RS485) and for power supply (module electronics and sensors). It is made of 2 twisted and shielded pairs of wires contained inside another 360° shielding.

There are two standardized types of cable:

- "Thick cable" for the trunk line
- "Thin cable" with smaller cable cross sections for drop lines

Network topology

Line structure with drop lines or for drop lines only. The trunk line is terminated by resistors on both sides, the drop lines do not require a terminating resistor.

Number of devices

- 64 nodes (including master)

Admissible transmission rates and line lengths

Depending on the transmission rate (Baud rate) the admissible cable lengths (main and stub lines) change as follows:

Transmission Rate	125 kbit/s	250 kbit/s	500 kbit/s
Max. line length main line (thick cable)	500 m (1.640 ft.)	250 m (820 ft.)	100 m (328 ft.)
Max. line length drop line	6 m (20 ft.)	6 m (20 ft.)	6 m (20 ft.)
Max. line length drop lines accumulated	156 m (512 ft.)	78 m (256 ft.)	39 m (128 ft.)

Configuration of devices

The individual participants are projectioned by means of the EDS files (Electronic Data Sheet) which are provided by the manufacturer for each slave. The EDS files for the Lumberg Automation™ bus modules can be downloaded from www.lumberg-automation.com/downloads.

Addressing

Addressing is implemented via software or rotary address switches. Software addressing can be implemented via addressing tools or the master.

U_S	Green	Sensor power supply
U_L (only 0930 DSL 651)	Green	Actuator power supply
MS (Module status)	Green Green blinking Red Red blinking Red/green blinking	Device is ready for operating Wrong configuration Unrecoverable fault Recoverable fault Self test is running
NS (Network status)	Green Green blinking Red blinking Red	Online, communication with PLC Online, no communication with PLC Time-out state of one or more I/O connections Failed communication device, Bus-off status, duplicate MAC-ID

The diagnostic message of the fieldbus is made at the DeviceNet™ modules of Lumberg Automation™ via an additional input byte, which is appended to the standard input process data. Depending on the module, the diagnosis is communicated module- or port-related. It is generated if its an overload, an actuator low voltage and an actuator short-circuit. In addition, corresponding LEDs simplify troubleshooting.

Product Description		
Type	**0930 DSL 108**	**0930 DSL 109**
		
Description	LioN-Classic DeviceNet™ device with 16 digital inputs (p-switching) to connect standard sensors, combined FIXCON®/M12 socket, 5-poles, rotary switches for addressing, M12 bus connection, 5-poles	LioN-Classic DeviceNet™ device with 16 digital inputs (n-switching) to connect standard sensors, combined FIXCON®/M12 socket, 5-poles, rotary switches for addressing, M12 bus connection, 5-poles
Technical Data		
Protection Class	IP67	
Environmental Temperature	0°C to +60°C	
Weight	570 g	
Bus System		
Transmission Rate	max. 500 kBaud	
Address Range	0 to 63	
System/Sensors Power Supply		
Rated Voltage	24 V DC	
Voltage Range	11 to 30 V DC	
Power Consumption	max. 80 mA	
Input Power Supply		
Voltage Range	min. (U_{System} – 1.5 V)	
Sensor Current	max. 800 mA	
Indicator	LED green	
Inputs (Type 3 acc. to IEC 61131-2)		
Rated Input Current	24 V DC	
Number of Digital Channels	16	
Status Indicator	LED yellow per channel	
Diagnostic Indicator	–	
Included in Delivery		
M12 Dust Covers	2 pieces	
Attachable Labels	10 pieces	

Bit Assignment

Bit	7	6	5	4	3	2	1	0
M12 Input								
Byte 0	8A	7A	6A	5A	4A	3A	2A	1A
Byte 1	8B	7B	6B	5B	4B	3B	2B	1B
Diagnostic								
Byte 2	OVL	–	–	–	–	–	–	–

OVL: Overload status

Diagnostic Indication

LED	Indicator	Condition
1...8 A/B	Yellow	Channel status
U_S	Green	Sensor power supply
U_L	Green	Module electronic supply
OVL	Red	Sensor short circuit/sensor overload
MS (Module status)	Green Green blinking Red Red blinking Red/green blinking	Device is ready for operating Wrong configuration Unrecoverable fault Recoverable fault Self test is running
NS (Network status)	Green Green blinking Red blinking Red	Online, communication with PLC Online, no communication with PLC Time-out state of one or more I/O connections Failed communication device, Bus-off status, duplicate MAC-ID

The diagnostic message of the fieldbus is made at the DeviceNet™ modules of Lumberg Automation™ via an additional input byte, which is appended to the standard input process data. Depending on the module, the diagnosis is communicated module- or port-related. It is generated if its an overload, an actuator low voltage and an actuator short-circuit. In addition, corresponding LEDs simplify troubleshooting.

I/O Modules Active – Stand-Alone: CANopen®

Be certain. Belden.

CANopen® – for Decentralized Use

CANopen® is an open communication profile for the CAN Bus (Controller Area Network) developed for automotive engineering. In the meantime, CANopen® is used in different areas like medical technology, maritime, traffic control, utility vehicles and automation.

General Technical Data

Decentralized installation for optimal space savings in machines and systems

Transmission medium

The connection between individual stations (nodes) is implemented via a hybrid cable for the transmission of data as well as the system and sensor supply.

It comprises two twisted and shielded lead pairs and total sheathing:

- "Thick cable" as the master line and/or for the bridging of greater distances.
- "Thin cable" with smaller cable cross sections for stub cables and networks of smaller spatial expansion.

Network topology

Line structure or line structure with stub cables. The main line must be terminated with resistors (120 Ω) on both sides.

Number of devices

- 127 nodes (including master)

Admissible transmission rates and line lengths

The maximum admissible length of line depends on the Baud rate used and the number of modules.

Transmission Rate	125 kbit/s	250 kbit/s	500 kbit/s	1.000 kbit/s
Max. line length	–	200 m	100 m	30 m
Max. line length stub line	–	3 m	1 m	0.3 m
Max. line length stub lines accumulated	–	78 m	39 m	3 m

Configuration of devices

The individual participants are projectioned by means of the EDS files (Electronic Data Sheet) which are provided by the manufacturer for each slave. The EDS files for the Lumberg Automation™ bus modules can be downloaded from www.lumberg-automation.com/downloads.

Addressing

Addressing is implemented via rotary address switches.

Product Description			
Type	**0930 CSL 108**	**0930 CSL 109**	**0930 CSL 651**
			
Description	LioN-Classic CANopen® with 16 digital inputs (p-switching) to connect standard sensors, combined FIXCON®/M12 socket, 5-poles, rotary switches for addressing, M12 bus connection, 5-poles	LioN-Classic CANopen® device with 16 digital inputs (n-switching) to connect standard sensors, combined FIXCON®/M12 socket, 5-poles, rotary switches for addressing, M12 bus connection, 5-poles	LioN-S CANopen® device with 8 digital inputs to connect standard sensors, M8 socket, 3-poles, rotary switches for addressing, M12 bus connection, 5-poles
Technical Data			
Protection Class	IP67		
Environmental Temperature	0°C to +60°C		-10°C to +60°C
Weight	570 g		190 g
Bus System			
Transmission Rate	max. 1000 kBaud		max. 1 MBaud
Address Range	1 to 99		1 to 127
System/Sensors Power Supply			
Rated Voltage	24 V DC		
Voltage Range	11 to 30 V DC		
Power Consumption	max. 80 mA		60 mA
Input Power Supply			
Voltage Range	min. (U_{System} – 1.5 V)		
Sensor Current	max. 800 mA		100 mA (at T_{amp} +30°C)
Indicator	LED green		
Inputs	(Type 2 acc. to IEC 61131-2)		(Type 3 acc. to IEC 61131-2)
Rated Input Current	24 V DC		24 V DC
Number of Digital Channels	16		max. 8
Status Indicator	LED yellow per channel		LED yellow per channel
Diagnostic Indicator	–		LED red per channel
Included in Delivery			
M12 Dust Covers	2 pieces		
Attachable Labels	10 pieces

1...8 A/B	Yellow	Channel status
Us	Green	Sensor power supply active
UL	Green	Module electronic supply active
OVL	Red	Sensor short circuit
MS (Module status)	Green Green blinking Red	PDO transfer with PLC No data communication, no connection to PLC the error setting is given to the outputs Invalid module address e.g. “0”
NS (Network status)	Green Green blinking Red blinking Red Red/green blinking Red fast blinking	Cyclic communication with PLC Searching for baudrate Warning bus connection Invalid bus connection No connection to PLC the error setting is given to the outputs Invalid module address e.g. “0”

The diagnostic message of the fieldbus is made at the CANopen™ modules of Lumberg Automation™ via an additional input byte, which is appended to the standard input process data. Depending on the module, the diagnosis is communicated module- or port-related. It is generated if its an overload, an actuator low voltage and an actuator short-circuit. In addition, corresponding LEDs simplify troubleshooting.

I/O Modules Active – Stand-Alone: Interbus®

Be certain. Belden.

Interbus® – a Fieldbus System

Interbus® is an internationally used fieldbus system. Since the first presentation of the system in 1987 the Interbus® has been modified, updated and improved and has become integral in numerous applications in the area of Automation Technology.

Lumberg Automation™ Products

To ensure the best application of the Interbus® in the decentralized sector, components must meet maximum electromechanical demands. The Lumberg Automation™ Interbus® components offer maximum protection for the electronic system due to the material used for the housing and the potting technology. The connection for Interbus® and the power supply of the module electronics, sensors as well as actuator system is implemented via M23 connectors. Bus terminals or TAPs are available for the connection to the bus.

General Technical Data

Absolute protection of electronics, thanks to use of high-quality components

Transmission medium

- Shielded twisted pair copper cable for differential signal transmission acc. to RS422 (RS485)
- Fiber optic cable
- Hybrid cable for the joint transmission of power supply and data with the installation remote bus

Network topology

Physically, Interbus® is built as a ring. Due to special cabling systems (e.g. transmit and receive lines in one cable, special T-connectors) it resembles a tree structure.

Partial systems in the Interbus®

- The Remote Bus (RBUS) has been designed for long distances. It connects the master with the first bus terminal and general remote bus participants with each other. A drop line from the remote bus is permitted and called a remote bus drop.
- The Installation Remote Bus is a variant of the remote bus. Apart from actual data lines the power supply for the module electronics and sensors is conducted in the Installation Remote Bus Cable.
- A Local Bus (LBUS) is a bus connection branching from the remote bus via a bus terminal and connecting the local bus participants with each other. Different variants of the local bus exist.

Number of devices

- Maximum 254 remote bus participants
- Total of 512 participants with max. 4096 I/O points

Configuration of devices

Projectioning does not require module-specific data, because the basic data are saved in the module. The relevant libraries can be used for a detailed or offline projectioning. The libraries for the Lumberg Automation™ modules can be downloaded from www.lumberg-automation.com/downloads.

Admissible transmission rates and line lengths

- Transmission rate: 500 kBit/s
- Overall remote bus length: 12.8 km
- Maximum distance between remote bus participants: 400 m
- Length of the installation remote bus: 50 m
- Distance between installation remote bus participants: 50 m
- Admissible current load of the installation remote bus: 4.5 A

Addressing

Modules are addressed automatically during the start-up of the bus depending on the physical position of the participants in the bus.

I/O Modules Active – Stand-Alone: AS-Interface

Be certain. Belden.

Actuator Sensor-Interface (AS-Interface)

AS-Interface was designed as a simple system for the quick data exchange of binary signals. An international standard since 1999, in accordance with EN 50295 and IEC 62026-2.

Quick and Uncomplicated

The biggest advantage of AS-Interface is the quick and uncomplicated installation of the system. Communication (Manchester Encoding) and energy are transmitted via a 2-wire cable. By using piercing technology for contacting the cable it is possible to insert a new slave at any point in the system. In addition, the arbitrary structure of the bus (line, tree, star, ...) permits the perfect adaptation to the plant or machine. AS-Interface is mainly used for small machines, as a subsystem for more complex bus systems (e.g. PROFIBUS-DP) or as an easy introduction to bus technology.

General Technical Data

Cost-efficient and innovative components for demanding actuator/sensor networks

Transmission medium

- Unshielded 2-wire cable for power supply (module electronics and sensors) and data transmission (Manchester Encoding)
- Optional mechanically encoded flat or round cable

Network topology

The bus can be built arbitrarily (line, star, tree, ...). Terminating resistors are not required.

Number of devices

- 31 slaves by using standard slaves
- 62 slaves by using A/B slaves with profile 3.0

Configuration of devices

No module-specific data is required for configuration, since the basic data is contained in the module. Appropriate libraries can be used for detailed or offline configuration. The libraries for Lumberg Automation™ modules can be downloaded from www.lumberg-automation.com/downloads.

Reliable transmission rates and segment lengths

- Transmission rate: 167 kBaud
- Max. segment length: 100 m

Addressing

AS-Interface slaves are generally addressed via software (the default address is generally "0" for all AS-Interface slaves).

This can be done in several ways:

- Via the master: The slaves are connected to the master consecutively. The latter automatically identifies the kind of slave and builds up a communication. Then the slave can be addressed.
- Via an addressing unit: All AS-Interface slaves can be addressed with the standard addressing unit "0913 ATL 003".
- Automatic addressing: If a slave in a network fails, AS-Interface offers the chance of auto-addressing. The defective slave is replaced by an identical one. The master identifies this slave and automatically addresses it to the address of the missing slave.

Fieldbus Variable I/O Modules: LioN-Link

Be certain. Belden.

I/O Modules Active – Modular (LioN-Link Series)

LioN-Link is a modular, decentralized IP67 system for field level applications.. Based on a bus coupler, the I/O modules are distributed independently of the field bus and decentrally via two lines to the field. Up to 15 modules can be connected per line. A 100 m extension is possible in each case.

Bus couplers are available for PROFINET, PROFIBUS, DeviceNet™ and CANopen® as well as digital I/O modules in 8 I/O universal or 16 I/O universal or 8 I and 16 I variants; there are also analog input modules as well as valve interface components. The digital input and output modules are equipped with universal I/O functionality, which allows the most varied configurations to be implemented as every signal pin can be used both as an input and an output – and without additional configuration.

The LioN-Link modules were developed for process-oriented use.

Thanks to an innovative technological development, the complete production process can be carried out without encapsulation, making LioN-Link modules ideal for use in the smallest handling robots due to their low weight.

All modules are vibration- and shock-proof as well as water-proof in accordance with IP67, which means they can be used in a process-oriented applications. The cordsets to the sensors and actuators can therefore also be shortened. Impermeability is guaranteed for a variety of coolants/lubricants. Critical or unfamiliar agents can be tested in our laboratory for compatibility.

The LioN-Link system offers a cost-optimized wiring solution, due to its field bus-independent I/O modules. The wiring of the LioN-Link modules is performed on the basis of standard wiring components such as CAN-/DeviceNet™ Thin Cables; no special cables such as fiber optic cables or M12 connectors with special plug-in arrangement (six-pole) are required. A terminating resistor is not required for connecting the last LioN-Link module in a line.

Use of standardized components allows a reduction in the variety of part types and simplifies global procurement.

LioN-Link provides a comprehensive portfolio of connection components at the field level. These include components for the control of electric drives, the networking of intelligent sensors and actuators (e.g., proximity switches, motor starters and valves) as well as straightforward retrofitting/conversion of machines.

Customized connectivity solutions for high flexibility on the field level

General Information

Standard features:

- Bus-independent I/O modules ensure excellent flexibility and reduced storage costs
- Space-saving, light-weight module for a wide range of applications
- Simplified planning, due to universal I/O modules
- Cost-effective solution – up to 480 I/Os on one bus coupler
- Quick availability with the use of standardized wiring components
- Easy and safe installation, thanks to color-coded slots
- High degree of reliability, as there are no terminating resistors
- Easy startup and extension of the system, because the modules operate without manual intervention

Customer Benefits

- Cost savings/profit increases
- Simple installation and maintenance: the time required is minimized, since the signals are bundled and transmitted via the field bus
- Flexibility: all standard field bus systems are supported
- Reliability: fail-safe modules with long service life (long-term stability)
- Competitive edge, owing to simple procurement of spare parts via world-wide sales network

Product Features

- Up to 15 devices per line, each with a 100 m extension
- Up to 30 I/O modules are possible on a bus coupler (480 signals)
- Analog and digital modules
- Variants for special applications (valve terminals, motor controllers, etc.)
- Field bus-independent I/O modules
- Additional network extension without repeater possible at maximum speed
- No terminating resistor needed

LioN-Link BusHead PROFINET Device Slave for the Connection Between the Higher Level Fieldbus and the Fieldbus Independent I/O Modules

Technical Information

Product Description	
Type	0940 ESL 601
	
Description	LioN-Link PROFINET BusHead, IP67 bus coupler module, M12 LioN-Link connection, 5-poles, M12 power supply connection, 5-poles, M12 LAN connection, 4-poles, D-coded, integrated 3-port switch, web server, IRT (Isochrone Real Time communication)
Note	BusHead for LioN-Link standard modules, Motion module “0942 UEM 783” and I/O-Link module “0942 UEM 620”
Technical Data	
Protection Class	IP67
Environmental Temperature	-10°C to +60°C
Weight	800 g
Bus System	
ID Number	VendorID: 0016A hex, DeviceID: 0302 hex
GSDML File	gsdml-v2.2-Lumberg Automation-LioN Link-20090623.xml
Transmission Rate	100 Mbit/s full duplex
System/Sensors Power Supply	
Rated Voltage	24 V DC
Voltage Range	19 to 30 V DC
Power Consumption	typ. 100 mA
Included in Delivery	
M12 Dust Covers	4 pieces
Attachable Labels	6 pieces

Diagnostic Indication

LED	Indicator	Condition
I/Os1	Red Green	Wrong configuration/module exchanged Online, communication with PLC
I/Os2	Red Green Off	Wrong configuration/module exchanged Online, communication with PLC Branch not in use
Us1	Green	Sensor/system power supply Line 1
Us2	Green	Sensor/system power supply Line 2
LNK/ACT	Green Orange blinking	Connection to an Ethernet device I/O device exchanging data
BF	Red	No I/O controller or wrong LioN-Link configuration
DIA	Red	Common indicator for periphery errors

Pin Assignment

LAN Connection M12, D-coded	LioN-Link Connection M12	Power Supply M12

0940 ESL 601

LioN-Link BusHead PROFIBUS Device Slave for the Connection Between the Higher Level Fieldbus and the Fieldbus Independent I/O Modules

Technical Information

Product Description			
Type	**0940 PSL 601**	**0940 PSL 602**	**0940 PSL 603**
			
Description	LioN-Link PROFIBUS BusHead, IP67 bus coupler module with M12 bus connection, 5-poles, B-coded, rotary switches for addressing, M12 LioN-Link connection, 5-poles, M12 power supply connection, 5-poles	LioN-Link PROFIBUS BusHead, IP67 bus coupler module with M12 bus connection, 5-poles, B-coded, rotary switches for addressing, M12 LioN-Link connection, 5-poles, M12 power supply connection, 5-poles	LioN-Link PROFIBUS BusHead with M12 bus connection, 5-poles, B-coded, rotary switches for addressing, M12 LioN-Link connection, 5-poles, M12 power supply connection, 5-poles
Note	BusHead for LioN-Link standard modules	Supports Profibus DP-V1 (acyclic communication), BusHead for LioN-Link standard modules, Motion module “0942 UEM 783” and I/O-Link module “0942 UEM 620”	BusHead for LioN-Link standard modules, PROFIBUS-Slave for applications such as tool change or options handling and “Shadow Mode” I/O module “0942 UEM 670”
Technical Data			
Protection Class	IP67		
Environmental Temperature	-10°C to +60°C		
Weight	200 g		
Bus System			
ID Number	0A36 hex	0B99 hex	0B98 hex
GSD File	Lum_0A36.gsd	Lum_0B99.gsd	Lum_0B98.gsd
Transmission Rate	max. 12 MBaud		
Address Range	1 to 125 dez		
System/Sensors Power Supply			
Rated Voltage	24 V DC		
Voltage Range	19 to 30 V DC		
Power Consumption	typ. 100 mA		
Included in Delivery			
M12 Dust Covers	2 pieces		
Attachable Labels	6 pieces		

Diagnostic Indication

LED	Indicator	Condition
I/O Line 1 I/O Line 2	Red Green Off	Wrong configuration/module exchanged Online, communication with PLC Branch not in use (module not connected)
U_{S1}	Green	Sensor/system power supply Line 1
U_{S2}	Green	Sensor/system power supply Line 2
BF	Red	Bus error
DIA	Red	Common indicator for periphery errors

Diagnosis according to Profibus specification, diagnosis for communication status, module breakdown and periphery faults in the Link system

Pin Assignment

LioN-Link I/O Modules – Digital Outputs

Technical Information

Product Description			
Type	**0942 UEM 602**	**0942 UEM 612**	**0942 UEM 782**
			
Description	LioN-Link I/O module with 4 digital outputs, 4 x M12 socket, 5-poles, 2 A per channel, one channel per socket	LioN-Link I/O module with 4 digital outputs, 4 x M12 socket, 5-poles, M12 actuator supply, 2 A per channel, one channel per socket	LioN-Link I/O module with 16 digital outputs, multipole cable interface to connect valve terminals, manual tool changing devices, IP20 terminal boxes
Note	Particularly suitable for the control of hydraulic valves.	Suitable for safety critical applications within performance levels A through D. The instructions in the LioN-Link manual must be observed in this case.	–
Technical Data			
Protection Class	IP67		
Environmental Temperature	-10°C to +60°C		
Weight	200 g		320 g (with 1 m cable)
System/Sensors Power Supply			
Rated Voltage	24 V DC		
Voltage Range	19 to 30 V DC		
Power Consumption	typ. 70 mA		40 mA
Output Power Supply			
Rated Voltage	24 V DC		
Voltage Range	19 to 30 V DC	19 to 28.8 V DC (SELV/PELV acc. to EN 60950-1)	19 to 30 V DC
Reverse Polarity Protection	yes/antiparallel diode	yes/antiparallel diode, external fuse with 4/6 A medium time lag mandatory	yes/antiparallel diode
Indicator	LED green		
Outputs			
Rated Output Current	2 A per channel		0.5 A per channel
Short Circuit-proof	yes		
Max. Current Carrying Capacity	4 A (3 pole supply line); 6 A (5 pole supply line)		6 A (3 A per group)
Number of Digital Channels	max. 4		max. 16
Status Indicator	LED yellow per channel		–
Diagnostic Indicator	LED red per channel		–
Included in Delivery			
M12 Dust Covers	2 pieces		
Attachable Labels	6 pieces		10 pieces

Protection Class	IP67	
Environmental Temperature	-10°C to +60°C	
Weight	375 g	800 g (with 5 m cable)
System/Sensors Power Supply		
Rated Voltage	24 V DC	
Voltage Range	19 to 30 V DC	
Power Consumption	typ. 100 mA	140 mA
Input Power Supply		
Voltage Range	min. (U_{System} – 1.5 V)	
Sensor Current	700 mA per module	700 mA
Indicator	LED green	
Inputs		
Rated Input Current	24 V DC	
Number of Digital Channels	max. 8	max. 16
Status Indicator	LED yellow per channel	–
Output Power Supply		
Rated Voltage	24 V DC	
Voltage Range	19 to 30 V DC	
Reverse Polarity Protection	yes/antiparallel diode	
Indicator	LED green	
Outputs		
Rated Output Current	1.6 A per channel	0.5 A per channel
Short Circuit-proof	yes	
Max. Current Carrying Capacity	9 A per module	6 A (3 A per group)
Number of Digital Channels	max. 16	
Status Indicator	LED yellow per channel	–
Diagnostic Indicator	LED red per channel	–
Included in Delivery		
M12 Dust Covers	4 pieces	
Attachable Labels	10 pieces

LioN-Link I/O Modules with 4 Analog Inputs

Technical Information

Product Description		
Type	**0942 UEM 630**	**0942 UEM 631**
		
Description	LioN-Link I/O module with 4 analog inputs, 0(4) to 20 mA to connect standard sensors, 4 x M12 socket, 5-poles	LioN-Link I/O module module with 4 analog inputs, 0 to 10 V to connect standard sensors, 4 x M12 socket, 5-poles
Technical Data		
Protection Class	IP67	
Environmental Temperature	-10°C to +60°C	
Weight	175 g	
Input Power Supply		
Voltage Range	min. (U_{System} – 1.5 V)	24 V DC
Sensor Current	700 mA per module	
Inputs		
Measurement Signal	(0)4 to 20 mA (current inputs)	0 to 10 V (voltage inputs)
Resolution	12 Bit + sign	
Measuring Fault (full measuring range)	± 1.2%	
Temperature Fault (full measuring range)	± 0.01%/K	
Output Formats	Siemens S7	
Input Impedance	≤ 400 Ω	20 Ω
Conversion Time	typ. 25 ms per channel	
Number of Analog Channels	max. 4	
Status Indicator	LED yellow: channel active	
Module Diagnostic (Module Status Sensor Short Circuit)		
Indicator	LED red/green (I/O)	
Channel Diagnostic		
Overload at Current Measurement	0 to 20 mA	–
Overload at Current Measurement/ Underflow/Broken Wire	4 to 20 mA	–
Indicator	LED red (DIA)	
GSD Configuration		
Module Way	Resolution12 Bit, 10 Bit (conversion time ≤ 3 ms/module)	
Channel Way	Measuring range 0 to 20 mA or 4 to 20 mA, broken wire (only 4 to 20 mA), channel on/off, diagnostic on/off	Channel on/off, diagnostic on/off
Included in Delivery		
M12 Dust Covers	2 pieces	
Attachable Labels	6 pieces

LioN-Link I/O Modules with Digital Inputs and Digital or Analog Outputs (Motion Drive Control)

Technical Information

Product Description		
Type	**0942 UEM 783**	
		
Description	LioN-Link-Motion module with 8 digital inputs and 4 universal outputs (digital or analog), M12 socket, 5-poles, Power supply is via a connecting cable with 7/8" connector, 3-poles	
Note	Only to be used in combination with BusHead 0940 PSL 602. Module used to control brushless (EC) motors as well as brush loaded (DC) motors and all types of digital actuators (e.g. valves or direct current motors). System specific specifications such as speed and acceleration/deceleration can be transmitted via the DP-V1 protocol.	
Technical Data		
Protection Class	IP67	
Environmental Temperature	-10°C to +60°C	
Weight	175 g	
System/Sensors Power Supply		
Rated Voltage	24 V DC	
Voltage Range	19 to 30 V DC	
Power Consumption	typ. 100 mA	
Input Power Supply		
Voltage Range	24 V DC	
Sensor Current	700 mA per module	
Indicator	LED green	
Inputs		
Rated Input Current	24 V DC, Input current typ. 5 mA	
Number of Digital Channels	max. 8	
Status Indicator	LED yellow per channel	
Diagnostic Indicator	LED red per channel	
Output Power Supply		
Rated Voltage	24 V DC	
Voltage Range	19 to 30 V DC	
Reverse Polarity Protection	yes/antiparallel diode	
Indicator	LED green	
Outputs	**Type I** (Type 3 acc. to IEC 61131-2 Output module Pin 2)	**Type II** (Type 3 acc. to IEC 61131-2 Output module Pin 5)
Rated Output Current	1.5 A per channel	–
Short Circuit-proof	yes	–
Max. Current Carrying Capacity	7.2 A per module	–
Number of Channels	max. 4 digital	max. 4 analog
Status Indicator	LED yellow per channel	–
Diagnostic Indicator	LED red per channel	–
Included in Delivery		
M12 Dust Covers	4 pieces	
Attachable Labels	10 pieces

Actuator/Sensor Distribution Boxes: M8 and M12 Connections

Be certain. Belden.

Passive Distribution Box (ASB Series)

Passive distribution boxes come in a variety of configurations and meet practically every on-machine application requirement. They include 4, 6, 10 or 12-port designs with M8 or M12 connections, single or duplex assignments, fixed home run cables or as an on-board pluggable variant. All variants are available with or without LED function indicators.

For particularly harsh environments, a series of distribution boxes with stainless steel housing and stainless steel screwing are available. The portfolio also includes actuator/sensor distribution boxes for avoiding electrostatic discharges. The distribution boxes are made from a special conductive plastic, which releases resulting electrostatic charges to the machine bed or machine ground, which is an indispensable part of universal ESD protection measures.

In order to meet the special requirements of the food and beverage industry, the product range includes distribution boxes whose materials are characterized by a high degree of resistance to aggressive cleaning and chemical agents.

Bundled, stable performance for full operational reliability

Flexibly and Quickly

Depending on the design, the bus can have a fixed connection to the distribution box or can be attached to the corresponding plug connection using an M12 or M23 connection line to provide more flexibility. Pluggable versions make it possible to replace individual defective wires instead of the entire distribution box, which facilitates quick maintenance and repair, while reducing costs.

Guaranteed Reliability

Lumberg Automation™ products are fully tested to ensure complete functionality and maximum operational reliability. LEDs for operating voltage and standard input/output signals make it easier to find errors relating to system malfunctions or other situations requiring maintenance or repair. This minimizes downtime.

IP67 – Resistance to Vibration and Jarring

Another advantage to using actuator/sensor distribution boxes is their particularly high level of resistance to vibration, which also increases the safety of the electrical wiring. With an minimum IP67 protection rating, actuator/sensor distribution boxes enable on-site installation close to inputs and outputs, which, in turn, simplifies the wiring and improves signal performance. A protective housing or additional protection using a subdistribution box is not necessary.

Optimal Handling

Lumberg Automation™ products combine compact construction and optimum handling characteristics to enable fast, easy, and safe wiring.

Compact: Due to their compact construction, M8 and M12 distribution boxes only take up a small amount of space in on machines or larger automated systems.

Turn 8 into 16

As with all Lumberg Automation™ distribution boxes, the gaps between individual slots have been designed to allow connection of 2-way T-distribution boxes, making it possible to control up to 16 actuators and sensors over a single 8-port distribution box.

For Harsh Environments

Stainless-steel models are also provided for use in food-processing machinery and other special applications where aggressive chemicals or cleaning agents are used.

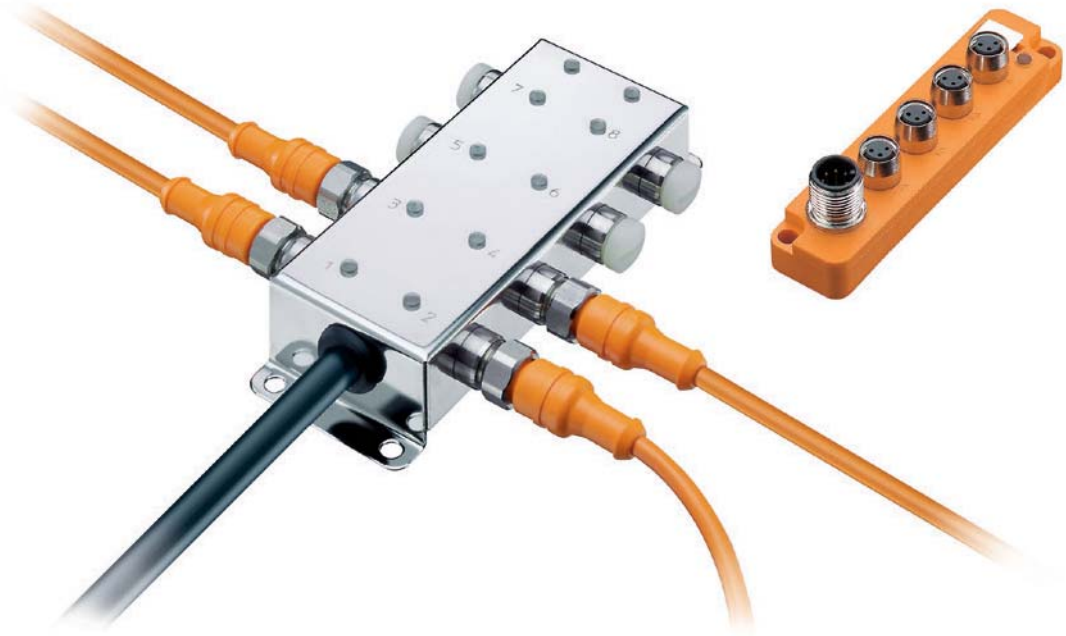
General Information

Standard features:

- Space-saving design for versatile applications in a minimum of space
- Quick installation, due to various fixing options
- Simple installation of both molded and field attachable connectors, thanks to displaced arrangement of the connections in the M8 distributors
- Broad range of applications, thanks to high vibration and shock resistance

Customer Benefits

- Cost savings/profit increases
- Simple installation and maintenance: because the signals are bundled, the time required is minimized
- Flexibility: various connection technologies (M12 and M8 sensors and actuators, pluggable on the side of the control unit or wired/flexible port variants from four to twelve)
- Ultimate reliability: fail-safe modules with long service life (long-term stability)
- Competitive edge, owing to simple procurement of spare parts via worldwide sales network



Excellent resistance, even under tough conditions

Product Features

- Environmental temperature: -25°C to +80°C
  (variants also for outdoor applications from -40°C to +80°C)
- Materials (depending on type of module)
  – Housing: die-cast zinc, PBT, TPU or stainless steel
  – Insert: PA or PVC
  – Contacts: CuZn, pre-nickeled and gold plated
- Mechanical data
  – Protection class: IP67/IP69K
- Electrical data
  – Nominal current at +40°C: 1.5 A to 4 A per port and up to 12 A per module
  – Nominal voltage: 10 to 30 V DC
- Module construction/granulari
  – M8 pluggable: 4-, 6-, 8-, 10-way
  – M8 with cable: 4-, 6-, 8-, 10-, 12-way
  – M12: 4-, 6-, 8-way distributor
  – Single or duplex channel model
  – With/without LED
  – Pluggable or with molded cable (complete solutions with wide choice of variants, including customer-specific solutions and OEM solutions)

		1 = 19 (+) 2 = 1 (7) 2 (4) 3 (8) 4 (14) 3 = 6 (-) 4 = 1 (15) 2 (5) 3 (16) 4 (3) 5 = 12 (PE)	1 = 19 (+) 2 = 1 (7) 2 (4) 3 (8) 4 (14) 5 (9) 6 (13) 3 = 6 (-) 4 = 1 (15) 2 (5) 3 (16) 4 (3) 5 (17) 6 (2) 5 = 12 (PE)	1 = 19 (+) 2 = 1 (7) 2 (4) 3 (8) 4 (14) 5 (9) 6 (13) 7 (10) 8 (18) 3 = 6 (-) 4 = 1 (15) 2 (5) 3 (16) 4 (3) 5 (17) 6 (2) 7 (11) 8 (1) 5 = 12 (PE)

Pin Assignment ASBSVD 8/LED W5

8 Ports			
	1 = +24 V (19) 3 = 0 V (6) 5 = 12 (PE)	**Channel B**	**Channel A**
		2 = 1 (7) 2 (4) 3 (8) 4 (14) 5 (9) 6 (13) 7 (10) DIA (18)	4 = 1 (15) 2 (5) 3 (16) 4 (3) 5 (17) 6 (2) 7 (11) 8 (1)

Diagnostic Indication ASBSVD 8/LED W5

LED	Indicator	Condition
1...8 A/B DIA	Yellow/white	Function
1...8 A/B DIA	Red	Periphery error*
PWR	Green	System power supply

* The peripheral error is sent as a collective message via the supply line to the control system. This message can be evaluated by the control system and issued as an error message. Therefore there is no channel B available for socket 8.

Pluggable M12 Rugged Distribution Boxes

Technical Information

Product Description		
Type	**ASBSV-R**	**ASBSV-R... LED**
		
Description	ASB-R pluggable actuator/sensor distributor, 4 and 8 ports, M12 socket, 5-poles, 2 signals per socket, earth connection, M23 connection for the control cable, 19-poles	ASB-R pluggable actuator/sensor distributor, 4 and 8 ports, M12 socket, 5-poles, with LED operating and function display, 2 signals per socket, earth connection, M23 connection for the control cable, 19-poles
Technical Data		
Environmental Temperature	-40°C to +80°C (for drag-chain applications -25°C to +60°C), UL max. +60°C	
Housing Material	Made of die-cast zinc; potting compound: 2K PUR	
Contact Insert	M12: PA, potted; M23: PBT	
Contact	CuZn, pre-nickeled and gold-plated	
Mechanical Data		
Protection Class	IP65/IP67	
Electrical Data		
Volume Resistance	≤ 5 mΩ	
Rated Voltage	11 to 30 V DC	
Rated Current	4 A per outlet/12 A max. total	
Included in Delivery		
M12 Dust Covers	2 pieces	
Attachable Labels	4 ports: 5 pieces, 8 ports: 10 pieces

Explanation of Product Characteristics

UL approved

CSA approved

Very good resistance to oils, coolants and lubricants as well as emulsions

Very good vibration and shock resistance

Suitable for use in drag chains in compliance with Lumflex® drag chain test

Very good resistance to flying welding sparks (e.g. unfinished constructions)

Very good resistance to acids, lyes and chemical cleaning agents

Very good electromagnetic resistance (EMC) and shielded systems
